

# PREFEEDER

## Fully Automatic System with Continuous Feeding

Reduce bottlenecks and downtime while improving safety

The PARA Prefeeder can optimize both rotary die cutter and flexo folder gluer production lines. This fully electric equipment features an elevator, double head system and laser-guided sensor to reduce common production bottlenecks that result from load changes in high-speed operations.

*Only sold and serviced through SUN in the UK, Ireland, US, Canada and Mexico.*

### NO FEEDING GAPS

Eliminate likelihood of paper flipping and jamming, regardless of warp.

### HIGH SPEED LOAD INTAKE

Suspend and bring in new loads to keep finishing machines running nonstop.

### EASIER MAINTENANCE

No hydraulics, pits or foundation work to reduce high-maintenance needs.

# PREFEEDER

## Prefeeder for Top and Bottom Print FFGs and RDCs

This machine greatly reduces the need for operator intervention, improving safety and efficiency. With the ability to store presets for future orders and remote monitoring via camera systems, this system fully automates the prefeeding process.

### Continuous Feeding

- No gaps in line, reducing likelihood of jams
- Production fully monitored via camera system

### Elevator and Double Head System

- Raise and suspend load, allowing new loads to enter
- Eliminate load change bottlenecks

### Laser-Guided Sensor

- Improve control of sheet speed
- Adjust shingling based on paper quality and warp
