

# VACUUM OVERHEAD STACKER

## Stack Bundles Faster, Cleaner, & Smoother

Improve throughput and efficiency with single-sheet outs.

The Stripper Stacker from PARA is designed for fast setup times and high-speed operation. With unique overhead vacuum capabilities and multi-sheet output with a double breaker, this system enables more boxes to be moved through a single revolution of your die cutting equipment.

*Only sold and serviced through SUN in the UK, Ireland, US, Canada and Mexico.*

### Overhead Vacuum

Suspends load under belt, allowing excess scrap to simply fall away.

### Multi-Sheet Output

Large sheet multi-outs with double breaker increase volume and reduce likelihood of jams.

### PARA Breaker Integration

Allows for any number of breaks on a single sheet. Seamless automation integration for custom bundle configurations.

# VACUUM OVERHEAD STACKER

## No More Jams with the Stripper Stacker

This setup from PARA does not enable multi-outs within the stacker, only afterwards in tandem with a breaker line. This reduces the likelihood of jams when doing multi-outs within a stacker: everything is nicked together and comes through as one sheet, so you're only ever bundling a single sheet instead of multiple.

### Hopper Section

- Bundles sheets
- Capable of full size, full width and length stacks

### Overhead Vacuum

- Suspends sheet under belt
- Scraps easily falls away

### Sheet Ejection Compatibility

- Can be integrated with a quality control camera system
- Safely ejects sheets without stopping production
